CT	300	Curved Track 8m02. 12 sections
CT	225	Curved Track 10m70. 16 sections

Unique about the CenterFold BarTrack: it folds as compact as possible. The crossties are folding underneath the BarTrack profile, together with the special designed turnbuckles. When developing this product we held the slogan "What you pack is what you track" meaning that a 1m50 section will only take up 1m50 lengths of space. Beside that these sections are much easier to carry around.

CenterFold tracks can be connected to SolidGripSystems Rigid and Scissor BarTrack

Curved tracks can also be ordered with the revolutionary Centerfold as crosstie. This new feature will reduce the packing size of a curved section by 50% without giving in on stability or robustness.

Prices on request

This flightcase can hold up to 5 sections of ST 150 CF
