

# PROSUP

professional camera support

The powerful and simple solution for mounting a camera on the hood or side door of a car. With it's powerful hand controlled suction cup, it can handle a working load of 50 kg. The camera platform can be rotated and is adjustable at an angle of 180°.

A hole pattern is made on the platform so it's possible to adjust several Prosup Products, like the Gimble, Offset Arm and 100 mm Bowl Leveller.

The Power Grip can also work in combination with the Prosup Car Grip which makes the clamping or chucking possibilities even more diverse.

Height; 10 cm.  
Width; 15 cm.  
Length; 22 cm.  
Weight; 8 kg.
